

# WHAT'S HAPPENING IN MY FIELD?

BRITISH FARMERS ARE PROUD TO CARE FOR THIS LANDSCAPE FOR US ALL TO ENJOY

This field is often used  
to grow food for  
**COWS AND  
SHEEP**

Farmers use a baler to  
create bales of hay that  
are all different shapes  
and sizes.

Oh hay there,  
did you know?

Hay is cut grass  
that has been dried  
in the sun before  
being baled.

Farmers also feed  
cows silage to make  
sure they get a  
healthy, balanced  
diet. Silage is made  
from cut grass,  
but it is fermented.
