

# International Carriage of Dangerous Goods by Road

## For anyone involved in farming or agricultural contracting

Dangerous goods are materials or items with hazardous properties which, if not properly handled, present a potential hazard to:

- human health and safety
- the environment
- infrastructure

**Look out for these symbols on any products you are using and check if your activities come within the scope of ADR:**

Oxidising Substances

Harmful, Toxic or Irritating Substances

Explosive

Acute Toxic Substances

Corrosive Substances

Hazardous to the Environment

Flammable Substances

Serious Health Hazard Substances

Gas Under Pressure

### Ask yourself:

**1** Are the goods you wish to carry classified as dangerous?

**3** Is the journey you are planning exempt from the regulations?

**2** Is the vehicle you are using exempt from the regulations?

**4** Does the type and quantity of goods you are carrying qualify for partial exemptions?

If you are not sure whether your goods are dangerous, contact the manufacturer.
